## Move Every Student Forward with an Innovative, Research-Based Assessment

Great design, innovation, technical excellence, and curricula-based content are the hallmarks of *TerraNova*<sup>®</sup>—one of the most trusted and respected assessment and reporting solutions for Grades K–12. In the tradition of an 85-year heritage of assessment excellence, Data Recognition Corporation delivers a breakthrough assessment solution that provides highly accurate and dependable results; results that translate into valuable, informed decision making in the classroom.

*TerraNova, Third Edition* is the industry's only suite of standardized achievement tests to feature a combination of custom and off-the-shelf scoring and reporting services. This allows you to build an assessment program that truly meets your needs.

### *TerraNova 3*—Because Falling Behind is Not an Option

*TerraNova 3* motivates your students to perform using engaging, relevant content that matches local curriculum and state and national standards. Items are presented using authentic, age-appropriate content to reflect real-world situations. In addition, you can further target instruction and improve student achievement with meaningful, actionable, and accessible data.

#### High technical standards

*TerraNova 3* takes full advantage of the latest advances in measurement research, including bias reduction studies, 2011 norms, and Item Response Theory.

The result is a valid, reliable assessment that meets the most rigorous psychometric standards.

#### Scoring and reporting when you need it most

We understand your urgent need to receive student reports with ample time available to address instructional needs. As a result, the new *TerraNova 3* scoring and reporting turnaround times will exceed your expectations. More than 30 comprehensive, diagnostic reports are available at the student, class, school, and district/diocese levels to give you quick and easy access to critical performance information.

## Count on *TerraNova 3* to Improve Student Achievement

**1. ALIGNMENT:** *TerraNova 3* aligns closely to the framework of the College and Career Readiness (CCR) Standards. It also supports customized reporting relative to your state standards and predictions to your state test when local research studies are conducted by DRC. You can count on *TerraNova 3* to inform instruction and improve student learning.

**2. RELEVANCE:** *TerraNova 3* features engaging and contemporary item content that motivates your students to perform. *TerraNova 3* also delivers comparisons of student performance using 2011 empirical norms. You can count on *TerraNova 3* to precisely measure your students relative to all of the expectations you hold for their performance.

**3. ACTIONABLE INFORMATION:** *TerraNova 3* integrates assessment and reporting options seamlessly and translates data into information you can use to improve instruction. For example, the Premier Home Report is available to showcase your student results and provide links to valuable instructional resources. Beyond the powerful reports that you've come to expect with *TerraNova*, now you can select reports that streamline complex information—using visual displays and familiar language to explain your student results. Results are more meaningful, more actionable, and easier to interpret. You can count on *TerraNova 3* to provide you with options for both standard and customizable reports.

**4. FLEXIBILITY:** *TerraNova 3* meets your assessment goals by providing the appropriate test format for your students. It offers numerous options to suit your needs: Multiple Assessments, which is the only standardized achievement test to combine selected and constructed-response items; Complete Battery, using selected-response items only; and Survey, for occasions when testing time is limited. You can count on *TerraNova 3* to match your assessment blueprint.

**5. QUALITY:** *TerraNova 3* features test items that reflect rigorous test-construction standards. It also ensures that each item is valid, and measures what is intended without embedded cultural bias. Research and development professionals ensure that the test measures a wide range of skills and proficiency levels. You can count on *TerraNova 3* to accurately measure student achievement and allow you to make the right decisions about instructional needs in your school, district, or diocese.
